How We Add Value:

- 1.) Utilize Morgan Stanley Global Investment Committee (GIC) asset allocation guidance to build a diversified portfolios with investments in Global Equities, Global Fixed Income and Alternative Asset classes. Align investment strategy with clients' customized financial plan with a focus on meeting clients' cash flow needs and long term liabilities.
 - 2.) Utilize Morgan Stanley Unified Managed Account platform to integrate Separately Managed Accounts, Exchange Trade Funds and Mutual Funds into centralized, Tax and Risk-Managed portfolios.
 - 3.) Define investment strategy for clients' overall portfolio and individual accounts, as well as investment philosophy for each asset class. Utilize Morgan Stanley Global Investment Management Analysis (GIMA) to select and monitor individual investment managers selected for the portfolio.
-

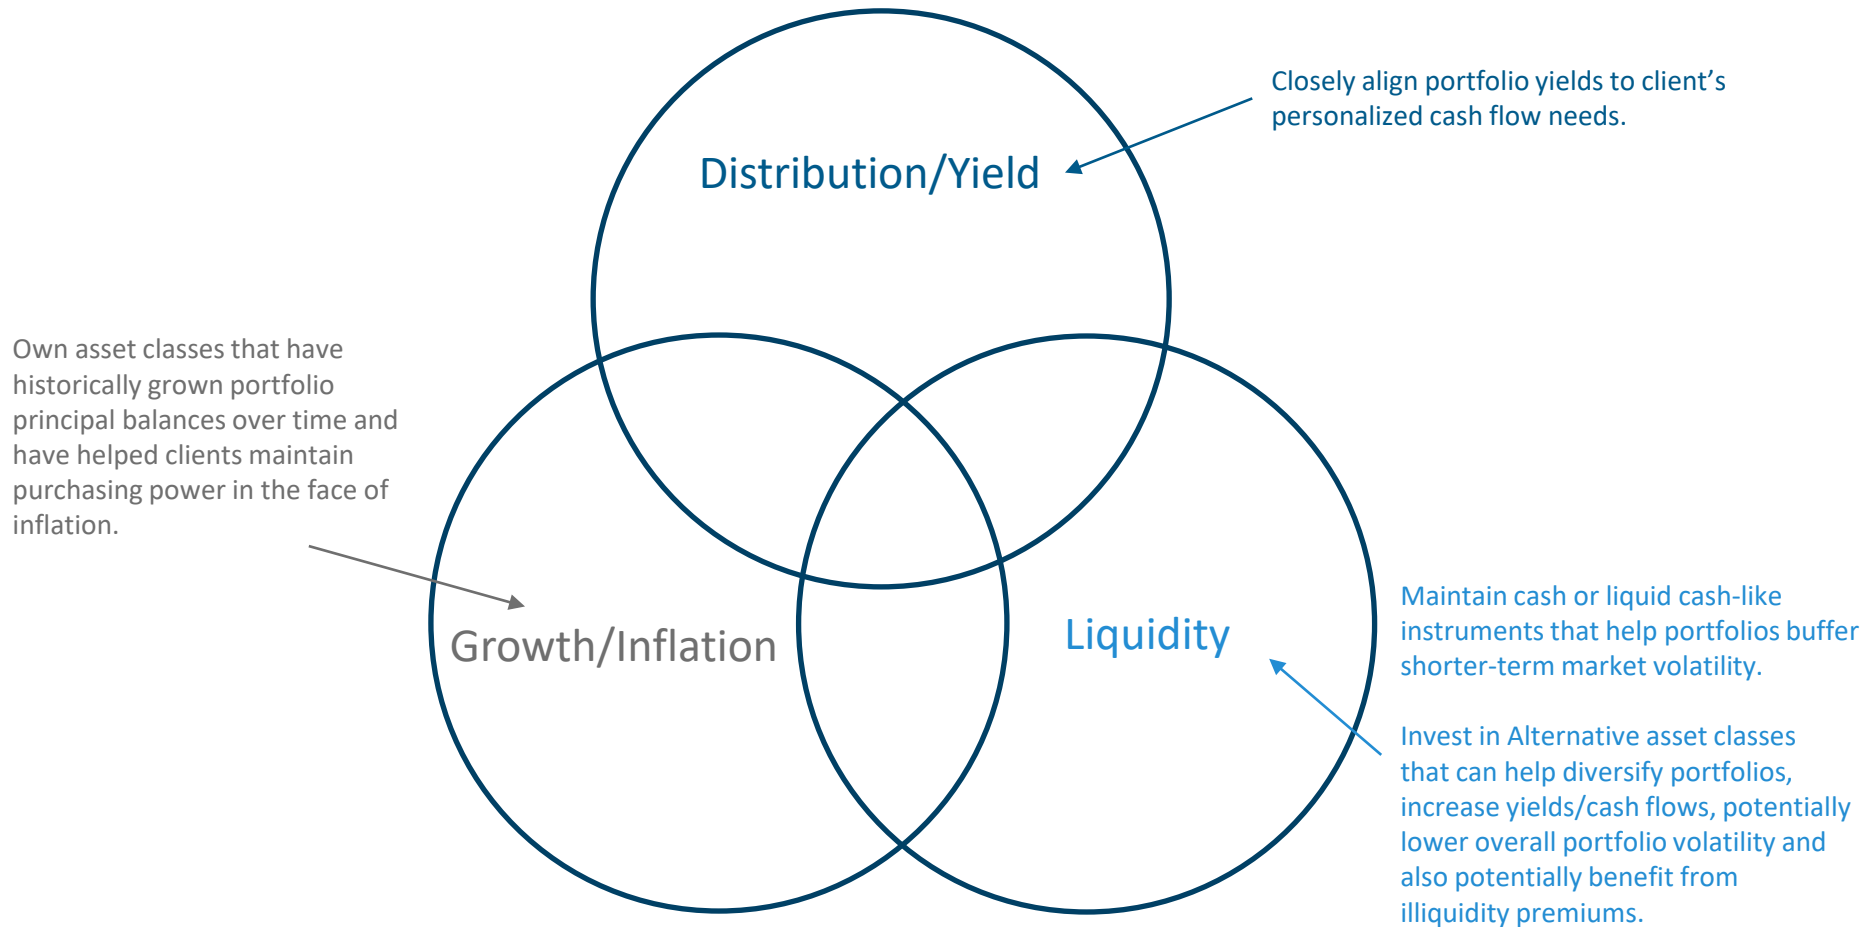

Investment Process

- 1.) While we do gain unique resources and strengths at Morgan Stanley, we do not think that any one organization has all the right answers. We constantly seek alternative views from top industry investment minds to challenge our investment thesis and search for new opportunities. Our process is predicated on selecting the best-in-class solutions within the industry's top open architecture platform here at Morgan Stanley. This results in independent thought and conflict free advice.

 - 2.) Because of our focus on high net worth and ultra-high net worth families, the bulk of the assets we manage are taxable. As a result we are acutely focused on immunizing client's cash flow needs with an emphasis on tax efficiency wherever possible. We get the best results when we can act holistically, integrating investment solutions with a comprehensive knowledge of a client's tax situation, estate and legacy objectives and philanthropic goals.

 - 3.) We think the best form of risk management is to know what you own, so we can work to reduce the risk of unexpected negative outcomes. This requires an understanding of the thesis, strategy and role of every investment in the portfolio. The integration of GIC capital market research, GIMA investment advisor research, Portfolio Risk Platform (Aladdin) and Unified Managed Account portfolio platform provides us the visibility and tools to manage risk across both the individual investments as well as the overall portfolio.
-

Framework for Building Durable Portfolios

Capital Tiers & Investment Time Frames

Liquid Bucket:

Funds clients need access to within 12-18 months. The benchmark for performance returns is the 1 Year Treasury, or CD rate available to a client.

Risk Adjusted Bucket:

Funds a client has a 2–5-year investment frame in mind for. The performance benchmark for these funds could be the bond market or an asset allocation framework like a 50 stock/50 bond portfolio - depending on how much time the client is willing to commit to the investments.

Growth Bucket:

Funds a client is planning on investing in markets for 5+ years. The performance benchmark could be the MSCI World Stock Index or the S&P 500. Good relative performance is not measured in months or quarter, but over market or investment time cycles.

Global Equity Philosophy

- 1.) We diversify portfolios across market cap, geography and investment style to provide clients with access to and opportunities from a full basket of global equities. Since we believe investors live off their portfolios, we emphasize managers that provide current yield, while growing investors' capital base over time.
 - 2.) We think passive investing has a role in portfolios, but we also think that the Efficient Markets Theory supporting blanket indexing has its challenges. Active managers can take advantage of mispricing opportunities and can potentially navigate risk in markets more proactively, leading to better risk adjusted returns over full market cycles. This is particularly true in smaller, less liquid and less efficient markets in the US and abroad. That said, all active managers are susceptible to periods of underperformance so, at times, we 'budget' active management risk by combining both active and passive strategies.
 - 3.) We utilize managers that take both long only strategic approaches as well as managers with more tactical near-term positions that focus on shorter horizon opportunities caused by investor behavior, momentum, technical factors in the market, etc...
-

Global Fixed Income Philosophy

- 1.) We think that diversification across US, International and Emerging Markets is essential to building robust fixed income portfolio. This is especially important now given divergent central bank policies across the globe.
 - 2.) In a rising rate environment, what has been a reliable source of income and stability must be viewed very differently. To hedge against interest rate risk domestically, we use diversification across geography, duration, tax status and credit quality in our portfolios. We employ these strategies with a diligent focus on the fact that this part of any client's portfolio is designed to produce cash flow yields, while protecting principal in down equity markets.
 - 3.) We utilize managers that take a more flexible and non-traditional approach to investing in the global fixed income marketplace and are not constrained by traditional benchmarks. These managers may employ multi-asset strategies, idiosyncratic investment philosophies or hedge portfolio duration risk with short positions and/or the use of derivatives.
-

Alternative Assets

- 1.) We leverage Morgan Stanley Wealth Management's dominant position in the alternative asset class segment and advocate an appropriate weight to non-traditional and opportunistic investment strategies in qualified client's portfolios. We view this allocation as essential to our overall portfolio strategy for what we think will be a lower return and higher volatility environment for traditional asset classes.
 - 2.) The ongoing dislocation of capital markets represents a prime source of low-correlation investment opportunities. Lack of traditional suppliers of capital and illiquidity premiums across hedge funds, private equity, private real estate, private credit and multi-asset class strategies may provide superior risk-adjusted returns over time.
 - 3.) Morgan Stanley's unique sourcing capabilities and specialized expertise in this area provides clients with opportunities in traditional mutual fund, registered investment company and partnership arrangements. Clients also benefit from co-mingled feeder funds that provide access to exclusive world class managers and benefit from the ability diversify across multiple strategies.

The Strategic Allocation represents the blend of asset classes identified by the Morgan Stanley Wealth Management Global Investment Committee, subject to various allocation constraints that the Committee believes is appropriate over the long run, for achieving maximum return potential for the level of risk tolerance associated with the Wealth Conservation model (Model 1). The Tactical Allocation seeks to maximize potential returns, for the same risk tolerance, over a shorter period (generally approximately 12 months). The Tactical Allocation is adjusted more frequently than the Strategic Allocation, although both are subject to change at any time. The analyses in this profile are based on the Strategic Allocations. (H) Denotes the hedged version of an index, and (U) denotes the unhedged version of an index.

The Strategic Allocation represents the blend of asset classes identified by the Morgan Stanley Wealth Management Global Investment Committee, subject to various allocation constraints that the Committee believes is appropriate over the long run, for achieving maximum return potential for the level of risk tolerance associated with the Opportunistic Growth model (Model 5). The Tactical Allocation seeks to maximize potential returns, for the same risk tolerance, over a shorter period (generally approximately 12 months). The Tactical Allocation is adjusted more frequently than the Strategic Allocation, although both are subject to change at any time. The analyses in this profile are based on the Strategic Allocations. (H) Denotes the hedged version of an index, and (U) denotes the unhedged version of an index.

"Success in investing does not correlate with I.Q... once you have ordinary intelligence, what you need is the temperament to control the urges that get other people into trouble in investing" – Warren Buffett

Disclaimers

This material does not provide individually tailored investment advice. It has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The strategies and/or investments discussed in this material may not be appropriate for all investors. Morgan Stanley Wealth Management recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a Financial Advisor. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives.

The views expressed herein are those of the author and do not necessarily reflect the views of Morgan Stanley Wealth Management or its affiliates. All opinions are subject to change without notice. Neither the information provided nor any opinion expressed constitutes a solicitation for the purchase or sale of any security. Past performance is no guarantee of future results.

Morgan Stanley Smith Barney LLC (“Morgan Stanley”), its affiliates and Morgan Stanley Financial Advisors or Private Wealth Advisors do not provide tax or legal advice. Clients should consult their tax advisor for matters involving taxation and tax planning and their attorney for matters involving trust and estate planning and other legal matters.

The sole purpose of this material is to inform, and it in no way is intended to be an offer or solicitation to purchase or sell any security, other investment or service, or to attract any funds or deposits. Investments mentioned may not be appropriate for all clients. Any product discussed herein may be purchased only after a client has carefully reviewed the offering memorandum and executed the subscription documents. Morgan Stanley Wealth Management has not considered the actual or desired investment objectives, goals, strategies, guidelines, or factual circumstances of any investor in any fund(s). Before making any investment, each investor should carefully consider the risks associated with the investment, as discussed in the applicable offering memorandum, and make a determination based upon their own particular circumstances, that the investment is consistent with their investment objectives and risk tolerance.

Alternative investments often are speculative and include a high degree of risk. Investors could lose all or a substantial amount of their investment. Alternative investments are appropriate only for eligible, long-term investors who are willing to forgo liquidity and put capital at risk for an indefinite period of time. They may be highly illiquid and can engage in leverage and other speculative practices that may increase the volatility and risk of loss. Alternative Investments typically have higher fees than traditional investments. Investors should carefully review and consider potential risks before investing.

- Loss of all or a substantial portion of the investment due to leveraging, short-selling, or other speculative practices;
- Lack of liquidity in that there may be no secondary market for a fund;
- Volatility of returns;
- Restrictions on transferring interests in a fund;
- Potential lack of diversification and resulting higher risk due to concentration of trading authority when a single advisor is utilized;
- Absence of information regarding valuations and pricing;
- Complex tax structures and delays in tax reporting;
- Less regulation and higher fees than mutual funds;
- Risks associated with the operations, personnel, and processes of the manager; and
- Risks associated with cybersecurity.

As a diversified global financial services firm, Morgan Stanley engages in a broad spectrum of activities including financial advisory services, investment management activities, sponsoring and managing private investment funds, engaging in broker-dealer transactions and principal securities, commodities and foreign exchange transactions, research publication, and other activities. In the ordinary course of its business, Morgan Stanley therefore engages in activities where Morgan Stanley’s interests may conflict with the interests of its clients, including the private investment funds it manages. Morgan Stanley can give no assurance that conflicts of interest will be resolved in favor of its clients or any such fund.

Past performance is no guarantee of future results. Actual results may vary. Diversification does not assure a profit or protect against loss in a declining market.

Alternative investments involve complex tax structures, tax inefficient investing, and delays in distributing important tax information. Individual funds have specific risks related to their investment programs that will vary from fund to fund. Clients should consult their own tax and legal advisors as Morgan Stanley Wealth Management does not provide tax or legal advice.

Interests in alternative investment products are only made available pursuant to the terms of the applicable offering memorandum, are distributed by Morgan Stanley Smith Barney LLC and certain of its affiliates, and (1) are not FDIC-insured, (2) are not deposits or other obligations of Morgan Stanley or any of its affiliates, (3) are not guaranteed by Morgan Stanley and its affiliates, and (4) involve investment risks, including possible loss of principal. Morgan Stanley Smith Barney LLC is a registered broker-dealer, not a bank.

International investing may not be appropriate for every investor and is subject to additional risks, including currency fluctuations, political factors, withholding, lack of liquidity, the absence of adequate financial information, and exchange control restrictions impacting foreign issuers. These risks may be magnified in emerging markets.

The value of fixed income securities will fluctuate and, upon a sale, may be worth more or less than their original cost or maturity value. Bonds are subject to interest rate risk, call risk, reinvestment risk, liquidity risk, and credit risk of the issuer.

Duration, the most commonly used measure of bond risk, quantifies the effect of changes in interest rates on the price of a bond or bond portfolio. The longer the duration, the more sensitive the bond or portfolio would be to changes in interest rates. Generally, if interest rates rise, bond prices fall and vice versa. Longer-term bonds carry a longer or higher duration than shorter-term bonds; as such, they would be affected by changing interest rates for a greater period of time if interest rates were to increase. Consequently, the price of a long-term bond would drop significantly as compared to the price of a short-term bond.

Asset allocation and diversification do not assure a profit or protect against loss in declining financial markets. Past performance is no guarantee of future results. Actual results may vary.

Global Investment Manager Analysis (GIMA) Focus List, Approved List and Tactical Opportunities List; Watch Policy. GIMA uses two methods to evaluate investment products in applicable advisory programs: Focus (and investment products meeting this standard are described as being on the Focus List) and Approved (and investment products meeting this standard are described as being on the Approved List). In general, Focus entails a more thorough evaluation of an investment product than Approved. Sometimes an investment product may be evaluated using the Focus List process but then placed on the Approved List instead of the Focus List. Investment products may move from the Focus List to the Approved List, or vice versa. GIMA may also determine that an investment product no longer meets the criteria under either process and will no longer be recommended in investment advisory programs (in which case the investment product is given a "Not Approved" status). GIMA has a "Watch" policy and may describe a Focus List or Approved List investment product as being on "Watch" if GIMA identifies specific areas that (a) merit further evaluation by GIMA and (b) may, but are not certain to, result in the investment product becoming "Not Approved." The Watch period depends on the length of time needed for GIMA to conduct its evaluation and for the investment manager or fund to address any concerns. Certain investment products on either the Focus List or Approved List may also be recommended for the Tactical Opportunities List based in part on tactical opportunities existing at a given time. The investment products on the Tactical Opportunities List change over time. For more information on the Focus List, Approved List, Tactical Opportunities List and Watch processes, please see the applicable Form ADV Disclosure Document for Morgan Stanley Wealth Management. Your Financial Advisor or Private Wealth Advisor can also provide upon request a copy of a publication entitled "Manager Selection Process."

The Global Investment Manager Analysis (GIMA) Services Only Apply to Certain Investment Advisory Programs GIMA evaluates certain investment products for the purposes of some – but not all – of Morgan Stanley Smith Barney LLC's investment advisory programs (as described in more detail in the applicable Form ADV Disclosure Document for Morgan Stanley Wealth Management). If you do not invest through one of these investment advisory programs, Morgan Stanley Wealth Management is not obligated to provide you notice of any GIMA Status changes even though it may give notice to clients in other programs.

Strategy May Be Available as a Separately Managed Account or Mutual Fund Strategies are sometimes available in Morgan Stanley Wealth Management investment advisory programs both in the form of a separately managed account ("SMA") and a mutual fund. These may have different expenses and investment minimums. Your Financial Advisor or Private Wealth Advisor can provide more information on whether any particular strategy is available in more than one form in a particular investment advisory program. Generally, investment advisory accounts are subject to an annual asset-based fee (the "Fee") which is payable monthly in advance (some account types may be billed differently). In general, the Fee covers Morgan Stanley investment advisory services, custody of securities with Morgan Stanley, trade execution with or through Morgan Stanley or its affiliates, as well as compensation to any Morgan Stanley Financial Advisor.

In addition, each account that is invested in a program that is eligible to purchase certain investment products, such as mutual funds, will also pay a Platform Fee (which is subject to a Platform Fee offset) as described in the applicable ADV brochure. Accounts invested in the Select UMA program may also pay a separate Sub-Manager fee, if applicable. If your account is invested in mutual funds or exchange traded funds (collectively "funds"), you will pay the fees and expenses of any funds in which your account is invested. Fees and expenses are charged directly to the pool of assets the fund invests in and are reflected in each fund's share price. These fees and expenses are an additional cost to you and would not be included in the Fee amount in your account statements. The advisory program you choose is described in the applicable Morgan Stanley Smith Barney LLC ADV Brochure, available at www.morganstanley.com/ADV.

Morgan Stanley or Executing Sub-Managers, as applicable, in some of Morgan Stanley's Separately Managed Account ("SMA") programs may effect transactions through broker-dealers other than Morgan Stanley or our affiliates. In such instances, you may be assessed additional costs by the other firm in addition to the Morgan Stanley and Sub-Manager fees. Those costs will be included in the net price of the security, not separately reported on trade confirmations or account statements. Certain Sub-Managers have historically directed most, if not all, of their trades to outside firms.

Information provided by Sub-Managers concerning trade execution away from Morgan Stanley is summarized at: www.morganstanley.com/wealth/investmentsolutions/pdfs/adv/sotresponse.pdf. For more information on trading and costs, please refer to the ADV Brochure for your program(s), available at www.morganstanley.com/ADV, or contact your Financial Advisor / Private Wealth Advisor.

The Global Investment Committee is a group of seasoned investment professionals who meet regularly to discuss the global economy and markets. The committee determines the investment outlook that guides our advice to clients. They continually monitor developing economic and market conditions, review tactical outlooks and recommend model portfolio weightings, as well as produce a suite of strategy, analysis, commentary, portfolio positioning suggestions and other reports and broadcasts. The GIC Asset Allocation Models are not available to be directly implemented as part of an investment advisory service and should not be regarded as a recommendation of any Morgan Stanley investment advisory service.

The GIC Asset Allocation Models do not represent actual trading or any type of account or any type of investment strategies and none of the fees or other expenses (e.g. commissions, mark-ups, mark-downs, advisory fees, fund expenses) associated with actual trading or accounts are reflected in the GIC Asset Allocation Models which, when compounded over a period of years, would decrease returns.

The Portfolio Analysis report ("Report") is generated by Morgan Stanley Smith Barney LLC's ("Morgan Stanley") Portfolio Risk Platform. The assumptions used in the Report incorporate portfolio risk and scenario analysis employed by BlackRock Solutions ("BRS"), a financial technology and risk analytics provider that is independent of Morgan Stanley. BRS' role is limited to providing risk analytics to Morgan Stanley, and BRS is not acting as a broker-dealer or investment adviser nor does it provide investment advice with respect to the Report. Morgan Stanley has validated and adopted the analytical conclusions of these risk models.

Any recommendations regarding external accounts/holdings are asset allocation only and do not include security recommendations. Transitioning from a brokerage to an advisory relationship may not be appropriate for some clients.

IMPORTANT: The projections or other information provided in the Report regarding the likelihood of various investment outcomes (including any assumed rates of return and income) are hypothetical in nature, do not reflect actual investment results, and are not guarantees of future results. Hypothetical investment results have inherent limitations.

- There are frequently large differences between hypothetical and actual results.
- Hypothetical results do not represent actual results and are generally designed with the benefit of hindsight .
- They cannot account for all factors associated with risk, including the impact of financial risk in actual trading or the ability to withstand losses or to adhere to a particular trading strategy in the face of trading losses.
- There are numerous other factors related to the markets in general or to the implementation of any specific strategy that cannot be fully accounted for in the preparation of hypothetical risk results and all of which can adversely affect actual performance.

Morgan Stanley cannot give any assurances that any estimates, assumptions or other aspects of the risk analyses will prove correct. They are subject to actual known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from those shown in a Report. The information is as of the date of the Report or as otherwise noted within the Report. Morgan Stanley expressly disclaims any obligation or undertaking to update or revise any statement or other information contained in a Report to reflect any change in past results , future expectations or circumstances upon which that statement or other information is based.

An investment cannot be made directly in a market index. For index, indicator and survey definitions referenced in this report please visit the following:
<https://www.morganstanley.com/wealth-investmentsolutions/wmir-definitions>

Yields are subject to change with economic conditions. Yield is only one factor that should be considered when making an investment decision.

Morgan Stanley offers a wide array of brokerage and advisory services to its clients, each of which may create a different type of relationship with different obligations to you. Please consult with your Financial Advisor to understand these differences or review our Understanding Your Brokerage and Investment Advisory Relationships brochure available at <https://www.morganstanley.com/wealth-relationshipwithms/pdfs/understandingyourrelationship.pdf>
