Medicare Planning

Medicare is health insurance funded by the U.S. government primarily for people ages 65 and over. There are no income requirements and eligibility is based on whether you or your spouse has worked at least ten years in Medicare-taxed employment.

The ideal time to apply for Medicare is during the Initial Enrollment Period, which typically starts three months before your 65th birthday, includes your birth month, and extends for three months after. Applying during this window ensures that you won't incur penalties and coverage will begin promptly.

You can apply for Medicare online through the Social Security Administration's website or by visiting a local Social Security office. It's crucial to understand the different parts of Medicare (Part A, Part B, Part C, and Part D) and choose the coverage that suits your healthcare needs, whether that's Original Medicare or a Medicare Advantage plan.
