*Source: Working Mother magazine (October/November, 2018)* SHOOK™ Research considered Financial Advisors who are mothers with children living at home and under the age of 18. Ranking algorithm is based on qualitative measures derived from telephone and in-person interviews and surveys: service models, investing process, client retention, industry experience, review of compliance records, firm nominations, etc.; and quantitative criteria, such as assets under management and revenue generated for their firms. Investment performance is not a criterion because client objectives and risk tolerances vary, and advisors rarely have audited performance reports.
