In sports, coaches use AI to analyze video footage and improve team strategies and players' techniques. It can suggest changes in plays or help an athlete improve their form.

At the time of this writing, and despite the lack of a concrete conclusion to the situation in Iran... the DOW is only 2% from its all time high. While oil is still hovering around \$100/barrel, the overall market continues to be resilient.

There are indications of potential developments regarding the conflict, and forecasts suggest possible economic improvements in the second half of the year. While we remain cautiously optimistic, we will continue to monitor rates, energy prices, and other economic indicators as we progress.

Finally, we want to say Happy Mother's Day to all of our moms out there. You are a gift to your children and families!

Morgan Stanley Smith Barney LLC ("Morgan Stanley"), its affiliates and Morgan Stanley Financial Advisors or Private Wealth Advisors do not provide tax or legal advice. Clients should consult their tax advisor for matters involving taxation and tax planning and their attorney for matters involving trust and estate planning and other legal matters.

This material has been prepared for informational purposes only. It does not provide individually tailored investment advice. It has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. Morgan Stanley Smith Barney LLC ("Morgan Stanley") recommends that investors independently evaluate potential investments and strategies, and encourages investors to seek the advice of a Morgan Stanley Financial Advisor. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. Past performance is no guarantee of future results.

Alternative investments are often speculative and include a high degree of risk. Investors can lose all or a substantial amount of their investment. They may be highly illiquid, can engage in leverage, short-selling and other speculative practices that may increase volatility and the risk of loss, and may be subject to large investment minimums and initial lock-ups. They may involve complex tax structures, tax inefficient investing and delays in distributing important tax information. They may have higher fees and expenses than traditional investments, and such fees and expenses can lower the returns achieved by investors.
