

## April Newsletter

**AI can detect diseases earlier than doctors. In some studies, AI achieved 99% accuracy in identifying cancerous cells.**

It's April, and the markets continue to be as volatile as the spring weather in the Texas panhandle. Hopefully by the time we publish the next Newsletter the mission in Iran will be completed and we will be in store for a great rest of the year. In the meantime, there are some opportunities that have been created to rebalance portfolios in preparation for potentially lower rates and economic growth toward the second half of 2026. Call us if you have concerns or questions about anything in your accounts. In addition, our world class firm has several exciting things in the pipeline to continue to benefit our clients, and we look forward to sharing more about that in the coming weeks!

### The Alts Report
